

Memorandum of Understanding for SFI® Logger Training, November 12 2008

The undersigned SICs agree to the following standards for interstate recognition of SFI® Qualified Logging Professionals (QLPs) and other Contractors

Each SIC shall recognize QLPs and Contractors who have completed another state's approved training programs, when said QLP or Contractor moves to work in another state, under the following conditions:

Information and/or training are immediately supplied to inform QLPs and Contractors on specific and unique state regulatory and voluntary forestry practices by the contracting entity.

Within twenty four months, QLPs and Contractors need to become fully compliant in that state's approved SIC Training Standards for QLP and Contractor.

Each state shall assign appropriate credit for training completed in another state, including any required continuing education credits.

All SICs recognize that each SFI® Participant's Procurement Policy may supersede any state's QLP and Contractor training requirements.
